

# ROLES IN TORSH TALENT

## TEACHERS

---

### What Teachers Can Do:

- Teachers are able to perform all functions in TALENT other than the functions listed below

### What Teachers Can't Do:

- Teachers cannot perform any management functions (e.g., invite users, delete users, disable users, create groups, approve transcript requests, etc.). Those functions are reserved for Admins exclusively.
- Teachers cannot initiate a review of a colleague's video without permission from that colleague. A colleague can request that a teacher provide a review against a specific rubric or framework. At that point a teacher can then perform the review. Coaches and admins are able to initiate reviews without a teacher's permission.
- Teachers cannot add videos to the Exemplars library. They may request that one of their videos be added to the library but only Admins and Coaches can create exemplar videos and add them to the exemplars library.

# COACHES

---

## What Coaches Can Do:

- Coaches are able to perform the same TALENT functions as Teachers
- Coaches can conduct reviews on videos that have been shared with them, regardless of whether or not the owner of the video has requested a review.
- Coaches can create exemplar videos and exemplar channels and add them to the Exemplars library.
- Coaches can perform exemplar management functions on videos and channels they create in the Exemplars library (e.g., add videos to channels, change visibility, remove, delete, etc.).
- Coaches can also perform exemplar management functions on videos and channels that other Coaches or Admins in their group(s) have added to the Exemplars library. Note: Coaches that are in all groups will be able to perform exemplar management functions on all videos and channels since they have access to all groups within your TALENT system.

## What Coaches Can't Do:

- Coaches cannot perform any management functions (e.g., invite users, delete users, disable users, create groups, approve transcript requests, etc.). Those functions are reserved for Admins exclusively.
- Coaches are not permitted to perform exemplar management functions on videos that other Coaches or Admins who are not in their specific group(s) have added to the Exemplars library (e.g., add to channel, change visibility, remove, delete, etc.).

# ADMINS

---

## What Admins Can Do:

- Admins are able to perform all of the functions that teachers and coaches can perform
- Admins can perform system management functions (e.g., invite users, delete users, disable users, create groups, approve transcript requests, etc.)
- Admins can create exemplar channels and add videos to the Exemplars library.
- Admins can perform Exemplars management functions on ALL videos in the exemplars library including videos that were added to the Exemplars library by other Coaches and Admins (e.g., add to channel, change visibility, delete, etc.).
- Admins can conduct reviews on videos that have been shared with them, regardless of whether or not the owner of the video has requested a review.

## What Admins Can't Do:

- Admins cannot view videos that have not been shared with them. In fact, other than videos in the exemplars library, no user can view a video that has not been explicitly shared with that user.
